

Declaration Concerning Food Contact

FDA (Food & Drug Administration)

Product: PBT GF30 natural

We hereby declare that the polybutylene terephthalate base matrix of our above-mentioned product, due to the resin manufacturer's data, complies with the requirements of the FDA regulation 21 CFR, Part 177, Section 1660 „Poly(tetramethylene terephthalate)“ concerning its chemical composition.

Restrictions

Glass-fibre reinforcement (GF30): This is a PBT compound reinforced with 30 % glass fibres. Food-contact suitability of the finished compound is not declared in a blanket manner; it depends on the glass fibre and other additives used and must be confirmed case by case.

Conditions of use: Food-contact suitability must be confirmed separately for the specific GF30 grade used. For unambiguous food contact, virgin (additive-free) PBT or an explicitly FDA-compliant grade should be used.

Compliance with these requirements was not checked on the semi-finished product, as these generally relate to the final article. The exact provisions of the above-mentioned FDA regulation can be found at:
<https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfcfr/cfrsearch.cfm>

The reference to 21 CFR 177.1660 relates to the PBT base matrix. For the glass-fibre reinforced GF30 compound, food-contact suitability depends on the additive used and the specific grade, and must be confirmed case by case.

Note: It is the customer's own responsibility to test the suitability of plastic items manufactured from or with our products for the planned application in the foodstuff industry. That includes for example:

- testing, if the physical characteristics of the plastic are suitable for the planned application,
- testing, if plastic parts manufactured by the customer fulfil the prescribed migration or extraction values,
- testing for possible influence of the plastic on the composition and/or organoleptic characteristics of foodstuffs.

This information is based on the information provided by our suppliers. We are not liable for the completeness and correctness of information contained herein. Food-contact suitability of the glass-fibre reinforced GF30 compound depends on the additive and grade and must be confirmed for the specific type used. Existing laws and regulations must be respected by the receivers/users of our product in their own responsibility.

All information contained in this document is provided in good faith and is based on sources believed to be reliable at the time of publication of this document. In the event of changes, for example due to legislation, manufacturing-related changes, or new scientific findings, this declaration will be reassessed and becomes invalid. This declaration expires automatically 12 months after the date of issue. It is the sole responsibility of our customer to ensure that the laws and regulations necessary for their intended use are complied with. Please request an up-to-date confirmation from Liedtke Kunststofftechnik if required.

The Food and Drug Administration (FDA) is an agency of the United States Department of Health and Human Services, one of the United States federal executive departments.
