

FDA Compliance Statement

Food contact in accordance with 21 CFR § 177.1580

Product: PC Industrial Grade

The material described below meets the requirements of the U.S. Food and Drug Administration (FDA) under Title 21 CFR § 177.1580 "Polycarbonate resins" for articles intended for use in contact with food, provided the limitations set out therein are observed.

Basis and Limitations

Legal basis: 21 CFR § 177.1580 – Polycarbonate resins, U.S. Food and Drug Administration.

Scope: Single and repeated food contact in accordance with the contact types and temperature conditions described in 21 CFR § 177.1580 in conjunction with 21 CFR § 176.170(c).

Reference: This statement refers to the unprocessed semi-finished product (sheets and round rods) in the natural colour as supplied. It does not apply without separate verification to coloured or further-processed variants.

Note: This statement describes the basic material-side suitability of the semi-finished product. It does not replace the processor's or user's own responsibility to verify:

- Migration behaviour and limit values for the specific application
- Cleaning, disinfection and sterilisation procedures
- Contact time, contact temperature and type of food
- Suitability of the finished, processed part for its intended use

This statement remains valid as long as the material composition does not change.

The above information reflects the current state of our knowledge and is provided for the information of our customers. It does not constitute a legally binding assurance of specific properties or a warranty in the legal sense. The processor or user is solely responsible for verifying the suitability of the product for its intended use and for compliance with all applicable statutory requirements.
