

FDA Compliance Statement

Statement on food contact per FDA (Food & Drug Administration) – relating to the PMMA base material

Product: PMMA Optical HC

We declare that the PMMA base material of the semi-finished product named above – based on the information generally applicable to acrylic (PMMA) provided by raw material producers – generally complies with the requirements of FDA regulation 21 CFR § 177.1010 "Acrylic and modified acrylic plastics, semirigid and rigid".

Restrictions

Important note regarding the coating: This statement relates exclusively to the PMMA base material. The one-sided hard coating of PMMA Optical HC is a proprietary surface finish whose exact composition and food-contact compliance are not known to us. The coating is expressly NOT covered by this statement. For food-contact use on the coated side, separate confirmation from the coating manufacturer is required.

Conditions of use: The PMMA base material meets the requirements of 21 CFR § 177.1010 for acrylic plastics intended for food contact. Compliance with these requirements has not been tested on the semi-finished product itself, as they generally relate to the finished part.

Note: It is the customer's own responsibility to verify the suitability of plastic parts made from our products for the intended use in the food industry. This includes in particular:

- checking whether the physical properties of the plastic are suitable for the intended application
- checking whether plastic parts manufactured by the customer comply with the prescribed migration or extraction limits
- checking possible effects of the plastic on the composition and/or organoleptic properties of food
- for contact of the coated side with food: separately clarifying the food-contact compliance of the hard coating with its manufacturer

Liedtke Kunststofftechnik's quality management system is certified to DIN EN ISO 9001 and forms an important basis for the consistent composition and quality of our semi-finished products.

All information in this document is provided to the best of our knowledge and is based on sources considered reliable at the time of preparation. In the event of changes, for example due to legislation, manufacturing-related adjustments, or new scientific findings, new statements will be issued; earlier statements thereby lose their validity.

This statement is valid for 12 months from the print date. It is the sole responsibility of our customers to comply with the laws and regulations required for their intended use. Please request an updated confirmation if needed.

The Food and Drug Administration (FDA) is an agency of the United States Department of Health and Human Services.
