

FDA Compliance Declaration

Declaration concerning food contact according to FDA (Food & Drug Administration)

Product: PI Polyimide Tecasint® 1011 natural

No compliance declaration concerning food contact under FDA regulation CFR 21 is available from the semi-finished product manufacturer for PI Polyimide Tecasint 1011 natural. The material is not declared for contact with food.

Restrictions

Food contact: PI Polyimide Tecasint 1011 natural must not be used in applications involving food contact without a separate, product-specific FDA compliance declaration. For applications involving food contact, we recommend selecting a material from our range that is declared for that purpose.

Note: It is the customer's own responsibility to test the suitability of plastic parts manufactured from our products for the intended use. This includes in particular:

- testing whether the physical and chemical characteristics of the plastic are suitable for the intended application
- checking whether an intended application involving food or medical device contact requires separate approval of the component
- consulting with us if an FDA-compliant material is required for the intended application

PI Polyimide Tecasint 1011 natural is furthermore expressly not intended for medical or dental implants.

All information contained in this document is provided in good faith and is based on sources believed to be reliable at the time of preparation. In the event of changes, for example due to legislation, manufacturing-related changes, or new scientific findings, new declarations will be issued; previous declarations become invalid as a result.

This declaration is valid for 12 months from the print date. It is the sole responsibility of our customers to comply with the laws and regulations required for their intended use. Please request an updated confirmation if needed.

The Food and Drug Administration (FDA) is an agency of the United States Department of Health and Human Services.
